

Concept Video Plan

Three Features to Showcase in the Video

1 Real-Time Health Insights & Alerts

Feature: The AI Assistant detects an elevated heart rate and provides real-time advice.

2 Personalized Daily & Weekly Health Summaries

Feature: The AI summarizes key health metrics and provides actionable recommendations.

3 Lifestyle & Habit Recommendations

Feature: The AI detects behavior patterns (e.g., caffeine intake affecting heart rate) and suggests healthier alternatives.

Video Storyline & Flow

Opening Scene – The Problem (10-15 sec)

A busy professional (Michael) is working on his laptop.

He suddenly feels a bit off and notices his smartwatch showing a high heart rate.

Problem: He doesn't understand why or what to do.

Feature 1: Real-Time Insights (20 sec)

His phone vibrates with an AI notification:

"Your heart rate is elevated—try taking a deep breath or a short break."

He follows the breathing exercise, and his heart rate stabilizes.

Feature 2: Personalized Health Summary (25 sec)

The next morning, Michael wakes up and checks his phone.

The AI presents his daily health summary:

"You walked 8,000 steps yesterday—keep it up! However, your sleep was 15% lower than usual. Try winding down earlier tonight."

He appreciates the insights and decides to sleep earlier.

Feature 3: Lifestyle & Habit Recommendations (25 sec)

Later in the afternoon, Michael grabs a coffee as part of his routine.

His AI Assistant notifies him:

"Your heart rate spikes after afternoon coffee. Consider drinking it earlier or switching to tea."

Michael thinks about it and opts for tea instead.

That night, he sleeps better and wakes up feeling more refreshed.

Closing Scene – The Impact (10-15 sec)

Michael looks at his smartwatch and smiles—his health is improving.

Text on screen: "AI-powered health insights, made simple."

Call to Action: "Understand your health, take action, and feel better every day."
